WORK EXPERIENCE

PBS Midwest

Software Developer

Chicago, USA

Jul 2026 - Present

- Designed and created a client-facing **website** for an ABA therapy clinic, enabling families to request consultations, apply for positions, and contact the clinic, replacing manual intake processes.
- Developed a secure admin dashboard for clinic staff to review and manage all submissions, with multilingual support.

Rush Orthopaedics Center | IIT – Pritzker Institute

Mobile App Developer

Chicago, USA

Feb 2026 - May 2026

- Built a mobile application for a smart-insole rehabilitation system, enabling clinical session analysis for patients with ACL and osteoarthritis.
- Used **MoticonGO sensors** to collect gait data and converted it into audio parameters, enabling biofeedback-driven therapy.
- Coordinated cross-functional development using Jira and Slack, aligning engineering tasks with clinical research goals.

Launch Ventures

Software Developer

Pune, India

Jun 2022 - May 2024

- Engineered 5+ cross-platform applications using Flutter and Firebase, serving 10k+ users.
- Improved UI performance by 25% through optimized rendering and state management.
- Automated CI/CD (Codemagic) pipelines, reducing deployment cycles by 30%.

PROFESSIONAL PROJECTS

Readiculous | Demo |

Jan 2025 - Feb 2026

- Developed a hybrid recommendation engine using XGBoost, TF-IDF/cosine similarity, and SVD collaborative filtering to generate personalized reader recommendations and location-specific library stocking suggestions.
- Deployed a Python Flask ML microservice integrated with a Node.js/MySQL backend to power real-time recommendations and retraining from live user activity.

Pittsburgh Regional Transit | Demo |

Jan 2026 - May 2026

- Built a data platform analyzing 15,000+ real-world survey responses and 10,000+ rider comments across 98 transit routes.
- Developed an LLM-powered assistant enabling natural-language queries for route insights and sentiment analysis.
- Designed ETL pipelines and dashboards to identify complaint patterns and improve transit planning decisions.

Careculator | Demo |

Jan 2026 - May 2026

- Built a healthcare cost-planning platform that helps users search 9,000+ clinics and 7,000+ insurance plans using public HRSA/CMS datasets and location-based search.
- Designed a recommendation system using ranking algorithms and multi-criteria filtering to optimize care selection

Koko Fresh Operator / Inyange Operator | Website |

Jan 2023 - May 2024

- Developed an application to monitor and manage 10 milk dispensing ATMs, featuring inventory and batch creation, AI-powered order forecasting with 30% accuracy boost, and a dispatch management system with real-time tray tracking, barcode scanning, and status filtering.

EDUCATION

Illinois Institute of Technology, Chicago / ITM in Applied AI and Data Science

Aug 2024 - May 2026

Courses : Programming for Data Analytics, Big Data Infrastructure, Data Mining and ML, Advance topics in Data Management, Data Warehousing, Service Oriented Architecture, Data Science Practicum.

MIT-WPU, Pune / Bachelors in Computer Science

Jul 2018 - May 2022

Courses : Object Oriented Programming, C, C++, Python, Digital Electronics, Internet of Things, Data Structures.

SKILLS

Programming & Frameworks: Dart, Java, Python, JavaScript, TypeScript, Flutter, Firebase, React.

Databases: MySQL, MongoDB, SQLite, GraphQL.

Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithm, System Design,

Web Development: HTML, CSS, React User Interface Design (UI/UX), Figma.

AI & ML: Pandas, numpy, scikit-learn, matplotlib, scipy, XGBoost, nltk.
